

```
new Operacion() {  
    @Override  
    public double ejecuta(double x, double y) {  
        return x + y;  
    }  
};
```

```
new Operacion() {  
    @Override  
    public double ejecuta(double x, double y) {  
        return x - y;  
    }  
};
```

```
new Operacion() {  
    @Override  
    public double ejecuta(double x, double y) {  
        return x * y;  
    }  
};
```

```
new Operacion() {  
    @Override  
    public double ejecuta(double x, double y) {
```

```
        return Math.pow(x,y);
    }
};
```

LAMBDA

Suma:

$(x, y) \rightarrow x + y;$

Resta:

$(x, y) \rightarrow x - y;$

Multi:

$(x, y) \rightarrow x * y;$

Potencia:

$(x, y) \rightarrow \mathbf{Math.pow(x,y);}$
